

Abstract Of The Disclosure

In a recording medium reproducing unit, hooks are given a holding-down function and a bending function to turn in a plurality of directions of flexible cables for connecting a circuit board to major components of a reproducing unit body. An adapter is provided on the under side of the reproducing-unit body to be adapted for various thickness values of disc players. A holding mechanism for a circuit board is provided in the adapter to secure an easy setting of a board within the reproducing unit.
